■ Da Nang, Vietnam | [linkedin.com/in/minhtri-embedded](https://www.linkedin.com/in/minhtri-embedded)

PROFESSIONAL SUMMARY

Embedded systems engineer with 6 years designing firmware for IoT devices and automotive ECUs. Proficient in RTOS, CAN bus, and low-power optimisation techniques.

EXPERIENCE

Firmware Engineer

2020 – Present

Bosch Engineering Vietnam · Da Nang

- Developed AUTOSAR-compliant BSW modules for EV battery management system.
- Reduced firmware footprint by 22% enabling deployment on cost-down MCU.
- Led porting of sensor fusion algorithm from MATLAB to embedded C.

Embedded Developer

2018 – 2020

Global CyberSoft (Renesas project) · Da Nang

- Implemented FreeRTOS task scheduler for home-automation gateway.
- Designed low-power sleep modes extending IoT device battery life 3x.

CORE SKILLS

C/C++ · FreeRTOS · AUTOSAR · CAN / LIN · STM32 · UART / SPI / I2C · Keil MDK · JTAG · Python · MATLAB

EDUCATION

B.Eng. Electronics & Telecommunications – Da Nang University of Technology (2018)

CERTIFICATIONS

- ARM Accredited Engineer (AAE)
- ISO 26262 Functional Safety (TÜV)
